Portfolio: bradleysloan.com

Summary

I'm a Product Manager with experience in web application development, UX/UI design, and technical documentation. My diverse background allows me to effectively manage development teams, create robust product roadmaps, and build scalable products.

Professional Experience

AccumTech 2021 - Present

Product Owner

- Designed product solutions for clients in the health insurance data management space
- Wrote technical requirements and designed prototypes for solution implementation
- Managed four development teams (20 developers), overseeing our build, SCRUM ceremonies, and release processes
- Established product roadmaps for ongoing enhancements and maintenance

The Mars Agency 2018 - 2021

Software Product Manager

- Designed product solutions for Mars' two flagship SAAS applications (Marilyn and SmartAisle) in the marketing and finance management space
- Wrote technical requirements and designed prototypes for solution implementation
- Managed two offshore development teams (18 developers), overseeing our build, SCRUM ceremonies, QA/Testing, and release processes
- Delivered software solutions and product roadmaps for multiple Fortune 500 clients
